drown with pain, disease or difficulties. Those who can do this easily are Buoyant.

Carcinocin is in the rubric Nature loves. This means *Carcinocin* pts are beautiful at heart. *Carc* loves her life, family, people, animals, everyone. The feel that a physician gets while talking to pt is she is a very lively, good at heart person.

Carcinocin is also used by many Homoeopaths as

Cancer nosode. Thus, we see *Carc* helping in many cancer cases. But in this case, *Carc* is a deep acting Similimum. And when there is more similarity, better are results.

KEYWORDS: Multicentric Multi-centric Ca – Bindaas – Courageous – Caring – Worrying about children – Positive – Bouyant-Buoyant- *Carcinocin*.

Don't Worry, be Happy

Dr MALAK SHAH MD (Hom)

Dynamis Homoeopathy Clinic, 2nd floor, Sun silver Apartment, Near Akota Garden, Akota, Vadodara Gujarat.

Email: drmalak_shah@yahoo.co.in ☎ 9328732388.

ABOUT THE AUTHOR: Dr Malak completed his MD. in Homoeopathy Repertory in 2007. He is passionate about delivering state of art care which led him to establish Dynamis Homoeopathy Clinic in 2007. He is an Assistant Professor- Repertory Dept, in Pioneer Homoeopathic Medical College.

CASE Male/54yrs, diagnosed as Lung cancer, 4th stage since 1 ½ years, consulted in March 2022.

CASE TAKING I would like to start with my first episode.

4 years ago, Ca intestine was detected, and I had been operated for it. I had also taken chemotherapy. Better after that.

Regular USG performed in between.

After 4 years, in last December 2020, I started complaint of breathlessness.

PET-CET was performed.

Ca-lung developed, and it was in 4th stage at that time.

Chemotherapy started from January 21.

9 cycles of chemotherapy were given and again PET-CT was done but still they found no positive changes in reports. So, they have started Nuclear medicine.

Again, chemotherapy with another type of medicine was given at every 15 days, Total 6 cycles.

But even then, no change found in reports.

(Observation: Patient is telling me in a very casual way as if telling a story, not at all affected by it.)

Doctor suggested, if you want chemo, we can continue but till now no positive results happened. We can change your chemotherapy.

Right now, it has also spread into your bone.

So, this is what I want to tell you till now. Right now, I don't have much problem except severe weakness and breathlessness.

Dr: Tell me more about yourself?

Pt: I was in marketing field, doing sales job. Stress regarding targets was there.

I had committed several mistakes regarding financial management.

I had borrowed some money. So, stress regarding whether I can repay or not was also there.

My family supported me during this period from 2000 to 2011.

I feel very guilty that because of my mistakes, my family is suffering.

Dr: Describe that?

Pt: I feel so much embarrassment (*patient was smiling when he told me about all these.*)

I feel so negative about all these. Even had a suicidal attempt at that time.

I felt mentally burdened.

So that time, I shifted to Vadodara.

Now there is no such problem.

Dr: What are the physical problems you have, right now?

Pt: Feel very weak and low energy while talking, require rest of 1 to 2 minutes in between talk. My elder son died at the age of 21. He had Cerebral palsy since birth. Doctor had clearly told us that until we are exhausted both mentally and financially, he will be there.

He had epileptic convulsions very frequently.

5 years ago in November 2016, on the day of Diwali, he just slept in my lap and passed away quietly without any problem.

(*Patient is smiling slightly while narrating this.*)

In December 2016, I developed abdominal pain after 45 days of my son's death.

I was already operated for appendicitis earlier. So, all tests were performed. Dr suggested doing PET-CT, which showed Ca-intestine and I had surgery.

Dr: What is the effect of your son's death on you?

Pt: I feel very quiet and numb. Suddenly, he died on my lap in 5 minutes (Crying) on the Diwali day.

"Sudden Shock." He just expired in 10 minutes without any symptoms. After 1 month, I developed this Ca Intestine.

After operation, 4 years passed.

Now I feel breathlessness on slightest exertion.

Otherwise, I am mentally very strong. Always positive. Never let anybody know that I am having cancer. I will never use 'C' word (Cancer) during my conversation. (*Pt is laughing*).

Even when I go for chemo, I go with up-to-date clothes. Doctor asked me where the patient is. (*Laughing*)

Even with all such side effects, I never let anyone

know that I am having such problem and even never asked doctor regarding the progress of the disease. Sometimes, I console my doctor regarding my illness. I would tell them that, "Don't worry be Happy." (*Laughing aloud.*)

In August 2020, my mother expired. She was on dialysis. At that time also, I remained quite strong. Right now, no other problems except dry cough+3, Weakness+3 and breathlessness+3 since 15 days. Breathlessness < slightest exertion even on changing clothes.

Dry cough < from weather change.

(*Patient's legs continuously moving while talking.*)

(*Pause for 2 minutes.*)

In these 4 years, I was very regular in my follow-ups, every 6 months. I went to my doctor, even though there was no problem and followed his each and every instruction.

Since 1 year I quit my job because of problem.

I had a habit of chewing tobacco, I quit 5 years ago.

PATIENT AS A PERSON

- THERMAL: Ambi-thermal.
- WEIGHT: Reduced 2-3 kg in last 1 year.
- STOOL: Regular, diarrhoea for 2-3 days after Chemotherapy.

INVESTIGATION

- PET-CT Scan reports on 24-2-22.
 - o Carcinoma colon.
 - o Ca- thorax.
 - o Lung: metastasis
 - o 2 Enlarged left Axillary Node.
 - o Metastatic to left iliac Bone.

ANALYSIS Very positive patient, never give up attitude.

Struggled a lot mentally and financially throughout life.

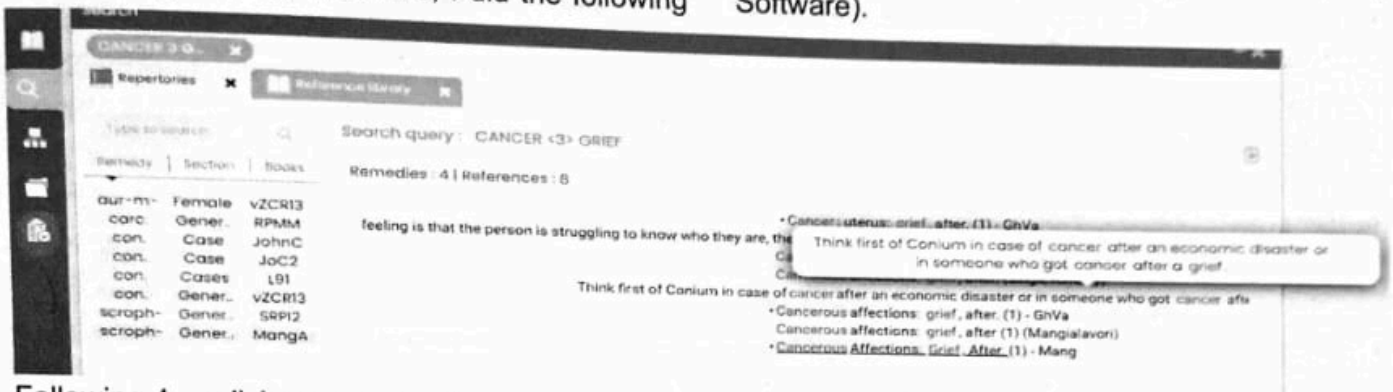

Cancer.

I would like to give him some medicine from cancer miasm or cancer Diathesis.

One thing, which is very prominent in this case is, on both the occasions especially the 1st episode, complaint started after his son's death.

I wanted to give him either *Ignatia* or *Carcinosinum*. But before giving any medicine, I did the following

global search in SHS (Synergy Homoeopathy Software).

Following 4 medicines were found.

- *Aur-m*
- *Carc*
- *Conium*
- *Scorp*

Again, while reading all these medicines from SHS, I found one sentence from article in Link 1995, that, "Think first of *Conium*, in a case of cancer after an economic disaster or in someone who got cancer after a grief." by Dr E Thielens.

In Phatak's Materia Medica, under Respiratory section it is written:

Constant tormenting cough from dry spot in larynx < when lying down, laughing, talking. Want to breathe, worst on least exertion.

According to Dr Rajan Sankaran Sir, *Conium* belongs to Umbeliferas family and Cancer Miasm. So, the feeling of *Conium* could be, "Must be in control when unexpectedly attacked."

PRESCRIPTION

- *Conium* 30 OD- night
- *Hydrastis* Q 10 drops TDS x 2 wks.

FOLLOW UP

After 15 days • Cough- better.

- Breathlessness less compared to before.
- Continue : Same prescription.

After 1 month.

- Hair falling- less
- Chemotherapy again started every 15 days.
- He is very positive in his attitude that some

positive effect of chemotherapy will be there.

- No teeth grinding like before.
- Severe dry cough with chest pain.

After 1 ½ months:

- Cough- better
- Headache - Hammering pain.
- Again, totally was made,
- *Conium* covered all symptoms.
- *Conium* 200 6P- TDS 2 days/Week.
- *Hydrastis* Q (10-10-10)

After 2 months.

- Headache severe.
- Based on totality,
- *Cadmium* 200- 4p BD/Wk.;
- *Conium* 30 OD;
- *Hydrastis* Q

Malak pl give totality)

After 2 ½ months.

- Become very irritable to noise.
- Headache - still there.
- Can't control urination.
- *Op* 30 TDS- 2 days.
- *Conium* 200 BD/Week;
- *Hydrastis* Q.

After 3 months, he died after a long battle with cancer. But in his last moments, homeopathy was able to give him a more peaceful death.

KEYWORD: Ca Intestine, Ca Lung, Metastasis, Terminal case, Grief, struggle, positivity, *Conium*, *Hydrastis*.
